

Carnivorous plant

Aufgaben:

1. Fill in the gaps with the right words!
2. Scan the QR code to check your answers!
3. Copy the text in your exercise book!
4. Formulate the content of the text yourself!

Use all gap words!

Carnivorous plants don't really eat _____. However, they catch insects or small spiders, because there aren't enough nutrients for them in the _____. There are over 600 different types of these plants.

Carnivorous plants grow everywhere in the _____, except for Antarctica. They need more sun and water than other plants, so there aren't as many in the _____ or the desert. They grow in soil that is too acidic or doesn't have enough _____ for other plants, such as swamps.

Otherwise, carnivorous plants wouldn't stand a chance against other _____, because carnivorous plants grow rather slowly.

Carnivorous plants have traps for small _____ or insects. An insect falls into a kind of hollow space made of leaves. It can't get out because the _____ are so smooth. Other carnivorous plants have sticky places that the _____ gets stuck on.
