

# How do you become a carpenter today?

---

## Aufgaben:

1. Fill in the gaps with the right words!
2. Scan the QR code to check your answers!
3. Copy the text in your exercise book!
4. Formulate the content of the text yourself!

Use all gap words!

Nowadays carpentry is an \_\_\_\_\_ that you can take up after normal school. Here in Germany, an \_\_\_\_\_ works in a timber construction company or in a carpentry shop. There he applies what he has learned in the \_\_\_\_\_ and collects practical experience. In Germany and \_\_\_\_\_ the training lasts three years, in Switzerland four years.

Whoever wants to become a \_\_\_\_\_ has to be strong and have a lot of stamina. Even if the very heavy \_\_\_\_\_ are lifted with the crane, there is a lot of work with your own \_\_\_\_\_. You not only have to be skillful with your hands, you also have to imagine well what an \_\_\_\_\_ from the plan will look like in reality. You have to like working \_\_\_\_\_, even in bad weather. And you should be \_\_\_\_\_ up there too.

The carpenter often works \_\_\_\_\_, for example on a machine. When building a house or a roof, however, \_\_\_\_\_ is required. Nobody can do it alone, you have to understand and support each other.
